"NEXT TO LANDA PARK"

Post Office Box 418

NEW BRAUNFELS, TEXAS

Dear Mr. and Mrs. Friend Customer

Please do us the honor of accepting this catalog, and with it our cordial invitation to visit our nursery, next to famous and picturesque Landa Park in New Braunfels, on Texas Hwy. No. 46 (Blanco Highway).

When you are in New Braunfels, come in and see our Nursery and Gardens.

Very truly yours,

NEW BRAUNFELS NURSERY
& FLORAL CO., INC.

Howard W. Locke, Mgr.

"WE HAVE NO CONNECTION WITH ANY OTHER NURSERY"

Landscape Architecture the Art of Planting Beautifully

Beautiful surroundings as a setting for your home are just as essential as the interior decorative effects employed to bring out the beauty of its furnishings and appointments. They serve to complete the picture your home presents and should be well planned and correctly planted.

To accomplish this with best results, it is advisable to secure the advice and services of a competent Landscape Architect. Let him prepare a diagram showing the location and variety of every shade tree, shrub and flower, and lay out and design walks and other Landscape features that will reflect good taste and harmonize with the architecture of your structure. Such a plan should be made before any planting is done or, preferably, even before construction is started.

Howard W. Locke is in charge of our Landscape Department. He is well trained for his position as he holds a degree in Landscape Art from Texas A. & M. College and has had practical training with such organizations as the National Park Service, National Forest Service, and the Texas State Highway Department. Also in engineering department with Consolidated Steel Corp., Orange, during war, helping with war effort.

Our Landscape Department has completed many representative landscaping projects for parks, public grounds, large and small homes and private estates both in town and in the country, and this same service is offered to you. It is not expensive to use and we cordially invite you to consult with us concerning all of your landscaping needs.

We have with us also Mr. Henry O. Maier, an experienced Nurseryman Landscape Man, who has been with our firm many years.

Member of the F. T. D.

Through our affiliation with the Florists' Telegraph Delivery, we telegraph orders of flowers for delivery anywhere in the United States. This Department is in charge of Thelka F. Locke, Florist, who has spent thirty years in the ART of designing floral arrangements.

WRITE FOR TREES AND VARIETIES NOT LISTED

Buying and Planting for Your Pleasure and Profit

The many different varieties of trees, shrubs, roses, plants and vines that are listed in this catalog are offered with our pledge that your order will be filled with care and dispatch and your demands will be satisfied in every possible way. "Buying and Planting for Your Pleasure and Profit" is definitely assured here.

Howard W. Locke, present manager of the nursery and landscape service, graduated from Texas A. & M. College, and furthered his horticultural and landscaping knowledge through his experience with the Alabama Park Service, The Texas State Highway Department, and the National Forest Service.

Thekla F. Locke has had many years' experience in designing floral offerings and in greenhouse management, is in direct charge of the floral shop and greenhouses. This department is a member of Florist Telegraph Delivery.

Our nursery is located next to Landa Park, one mile west of the Comal County courthouse at New Braunfels, Texas. Service to and from New Braunfels by parcel post, motor express or freight, express and freight is the best and permits us to make our deliveries promptly. We have no connection with any other nursery and respectfully solicit your orders and inquiries.

When and How to Order

Place your order as soon as a decision has been reached so that we may reserve the stock you order.

The shipping season usually runs to May 1. Orders that can conveniently move via motor truck may be delivered at any time. While we appreciate personal visits, if that is inconvenient, send in your order by mail on the Order Blank which is enclosed for your convenience.

USE OF THE ORDER BLANK: Fill in the Order Blank in complete detail, as that will facilitate handling your order. Write or print your name and full address plainly. List your items by name, giving quantity and prices. Any other matter should be written on a separate sheet of paper.

TERMS: Our terms are Cash With Order.

PRICES: The prices listed herein are Net, f. o. b. New Braunfels, Texas, except as noted and supersede all previous prices and are subject to change without notice.

Twelve of a variety may be had at the price of ten; larger quantities quoted on request.

No charge is made for local deliveries, but on all shipments the purchaser pays the carrying charges.

Small items may be shipped by Parcel Post and if you wish shipment that way add 20 per cent to cover postage. For shipments up to 300 pounds and all shipments requiring quick delivery, Express is most sat-

isfactory. For very large and heavy shipments, and for shipments that do not require quick delivery, freight is satisfactory. Express and Freight shipments are sent "Charges Collect." Give explicit shipping instructions, otherwise we will exercise our best judgment.

PACKING: No charge is made for packing except on a few bulky items and on deciduous stock handled during the summer which must be balled and burlapped. Packing on these will be charged at cost.

REMITTANCE: Make your remittances payable to NEW BRAUNFELS NURSERY & FLORAL COMPANY. The best way to send them is by Bank Draft, Express Money Order, Post Office Money Order. Money should be sent by registered mail. Checks will be accepted from responsible parties.

The success of your plants depends on the care given them. Treat them well and confer with us often regarding their care. We want them to grow and thrive for you and will give you all of the assistance you ask for.

CLAIMS: We ship only first class stock, "True to Name," that meets specifications. Any errors will be gladly corrected. All claims, except for "trueness to name," must be made in writing within five days after receipt of shipment. As all shipments are in good condition and properly packed when delivered to public carriers, our responsibility ceases there. Shipments then move at purchaser's risk and claims for damages must be made to the transportation company.

3 for \$1.00

Juniper

THE HANDLING OF SHRUBS AND OTHER PLANTS

All shrubs, trees and other plants that are obtained from nurseries are grown in two different ways; in the open ground, or in pots, tubs, or cans. Those grown in pots, tubs and cans are easily handled; if grown in open ground they are taken up, either bare rooted, or with earth about the roots. When they are dug with earth about the roots, they are called Balled and Burlapped.

POT GROWN PLANTS

Many varieties are grown in pots, tubs, or cans. These can be transplanted or shipped at any time of the year, and immediate planting effects can be accomplished.

BARE ROOTED (BR) PLANTS

These consist of plants taken from the open ground (where grown) with bare roots, usually handled during dormant winter season—from November to April, they are shipped without any soil on roots, but are well dipped in mud, and packed in wet straw for protection against exposure, and evaporation (drying out).

BALLED AND BURLAPPED (B&B) PLANTS

Are those that have been dug with the roots in place, in the original soil. Burlap is then tied around the ball of earth, and the plant should be carefully handled by the ball, rather than the tops (foliage) so as not to loosen the earth around the roots. Burlap should not be removed when plant is set out.

JUNIPER Pfitzers: Low spreading, blue green foliage, very attractive, evergreen.
15-18 in. plants—B. & B.....each \$2.50
18-24 in. plants—B. & B.....each 3.50

5-6 ft. trees	each	1.40—10 for 13.00

WRITE FOR TREES AND VARIETIES NOT LISTED

TO OUR CUSTOMERS:

Here at our nursery, we submit the following schedule for your guidance:

BUSINESS HOURS AT NURSERY

8:00 a. m. to 6:00 p. m.—Weekdays

8:00 a. m. to 5:00 p. m.—Saturdays

Nursery closed all day on Sundays and Holidays.

The above hours of business apply to NURSERY ONLY.

APRICOTS

Every orchard should have Apricot trees. It is a delicious fruit, and also very early ripening, when there is not much fruit on the market. Should be sprayed for best results.

MOORPAK—LARGE, EXCELLENT ROYAL, LARGE, OVAL, YELLOW & RED

CLUSTER: Vigorous and hardy, medium size fruit, yellow, delicious, ripen June 20.

2-3 ft. trees	each	\$.75—10 for \$ 6.50
3-4 ft. trees	each	1.00—10 for 9.00
4-5 ft. trees	each	1.30—10 for 12.00
5-6 ft. trees	each	2.25—10 for 20.00

BERRIES

BOYSENBERRY: New variety of berry, extra large fruit, fine flavor, heavy bearer, flavor similar to raspberry.

Each 11c—12 for \$1.00—100 for \$9.00

McDONALD: Ripen May or June, cross between dewberry and blackberry. Good for shipping.

Each 5c—12 for 50c—100 for \$3.00

THORNLESS DEWBERRY: Very much like Austin Dewberry, but thornless.

AUSTIN DEWBERRY: Large, prolific bearer, firm, ripen in May.

Each 10c—12 for \$1.00—100 for \$5.00

ST. AUGUSTINE GRASS

"St. Augustine Grass has no equal as shade grass in Florida or on the coastal plain of the Southern States. It grows equally well in the sun or shade. If given plenty of water and nitrogen fertilizer, it will grow under practically all conditions in this section. Since seed is not available, lawns are started vegetatively."

This beautiful grass remains a bright peagreen the year round, grows as well in the shade as in the sun and does away with dead grass or expensive rye grass sowing in the winter.

We furnish firm, vigorous plants for your lawn at the following prices:

Runners, \$1.00 per 100; \$7.50 per 1,000; and Sod at \$1.25 per square yard. We will furnish estimates for new lawns or renovations of old lawns.

Strawberries

- **BLAKEMORE:** Large, red everbearing.

- **KLONDIKE:** Large red fruit, heavy producer, good vigorous grower. Hardy.

Each 4c—12 plants for 40c—\$3.00 per 100

FIGS

Figs are well adapted to our Southwestern climate and should be planted more extensively. With minimum care and attention you can have strong, prolific bushes with ripe figs every day from early June until frost.

- **TEXAS EVERBEARING:** Heavy bearer, sweet, delicious, brownish-yellow, thin skin, bears from July to October.

- **BROWN TURKEY:** Medium brown, very sweet. July to August.

- **MAGNOLIA:** Large green, bears July to September, well known.

- **CELESTIAL:** Small blue, sugar fig.

PRICES ON FIGS:

2-3 ft. each \$.75
3-4 ft. each 1.00

GRAPES

NIAGARA: Fine White Grape.

BLACK SPANISH: Prolific Black Grape.

- **EDNA:** Good Grape.

MUNSON: Fine red Grape.

CARMAN: Very dark red, very delicious, good in south Texas, ripen July.

- **CONCORD:** Blue grape, large, ripen in July. Old known variety.

FREDONIA: Good Blue-Black grape. Delicious table grape. Medium size, ripen in July.

PRICES on Grapes:

Each 40c—10 for \$3.50—100 for \$30.00

NECTARINES

SMOOTH: Skinned peaches. We should plant more, and get better acquainted with this delicious plum-like fruit.

- **BRECK:** Similar to Honey peach, heavy bearer, white, does not crack open like Honey peach.

- **DAVIS:** Very good, white meat, red meat around seed, firm meat.

PRICES on Nectarine Trees:

3-4 ft. trees each \$1.25—10 for \$11.00

4-5 ft. trees each 1.50—10 for 13.50

PEARS

Pears are long lived trees, produce well, and bear a fruit that is very delicious. The varieties listed here, have been proven best for this territory. It is very important to spray the trees to get a good crop, and also to pick them at the right time.

- **DOUGLAS:** Ripens in July. Large and good flavor, yellow with red cheeks.

- **GARBER:** Ripens in August. Large, firm pear. Vigorous grower.

- **KEIFFER:** Ripens in September. Vigorous and fruitful. Large fruit. Yellow with Vermillion cheeks. Good for preserves and canning.

- **LE CONTE:** Ripens in July. Medium bell shape, creamy yellow, with blush.

PEACHES

Peaches are regarded as the best fruit crop for the South. There are many large, successful peach orchards in Texas and you too can have fine peaches for home consumption or for commercial markets if you plant the varieties we have carefully selected because of their favorable habits and qualities. We will be glad to advise you in regard to the particular varieties that are best adapted to the various sections of Texas and the Southwest.

Do not plant peaches in chicken yards or poultry runs. Spray well for best results.

— **BELLE OF GEORGIA:** Ripen June 25—Large, white early peach. Good shipper, freestone.

— **MAYFLOWER:** Ripen May 25—Medium size fruit, white with red, freestone.

— **EARLY WHEELER:** Ripen May 30—White and red cheek. Cling, good bearer.

— **CARMAN:** Ripen July 1—Good commercial variety, large, white with red cheeks. semi-cling.

— **MELBA:** Fine white, Honey peach.

— **PALLAS:** Ripen July 1—Medium size, white, sweet, heavy bearer, freestone. Improved honey type.

— **MAMIE ROSS:** Ripen July 5—White red, semi-cling, heavy bearer. Large fruit, best white peach, reliable.

— **LEONA:** Ripen July 10—Large, yellow, freestone, red cheeks, good in black heavy soils. Good commercial variety.

— **CHILOW:** Ripen July 15—Large, cling, yellow with red, good flavor.

— **EARLY ELBERTA:** Ripen July 1—Early ripening variety of Elberta peach. Same qualities as Elberta, but more hardy and prolific. Yellow freestone.

— **ELBERTA:** July 15—Widely known yellow freestone. Large.

— **HALE HAVEN:** Ripen June 25. Freestone. Beautiful yellow peach, good orchard variety, large fruit, heavy bearer.

— **J. H. HALE:** Ripen July 15—Large, excellent flavor, yellow freestone, red cheek, good commercial variety.

— **FRANK:** Ripen July 30—Best yellow cling. Large, sweet, firm, heavy bearer, good for picking and canning. Everyone should plant some of this fine variety.

— **BABCOCK:** White, freestone, improved honey peach. Ripen July 15.

— **AUGBERTA:** Ripen August 10—August ripening Elberta, large, yellow, freestone.

— **INDIAN CLING:** Ripen August 5—Medium size, red meat, cling, good variety for table use.

— **SOUTHLAND:** Sport of Halehaven, ripens about 16 days before Elberta peach or July 1st. Freestone, medium large, round light red blush, yellow meat, firm, good flavor, vigorous growth and good producer. Good peach for the South. Good for canning and frozen food.

— **DIXIRED:** Ripens two weeks before Golden Jubilee peach, cling stone, medium-sized, round flesh yellow with red cheeks. Early peach, firm, good for shipping, does not require too cold winter.

— **DIXIGEM:** Ripens June 15, Medium-sized, ovate, yellow flesh, semi-freestone, excellent flavor, firm flesh, early shipping variety, prolific.

PECANS

The Pecan is a variety of tree that is able to acclimate itself to any condition, or climate, being hardy anywhere in the Southwest. Pecans are a proven, profitable, commercial crop, and also will be good insurance to prosperity. Some of the most neglected bottom lands are the best lands for fine pecan orchards. Plant nursery grown, grafted trees, as you will time and money by doing this. These trees also make beautiful shade trees.

How to Plant Pecan Trees

First, prune each branch approximately one-third of original length. Plant two to three inches deeper than it stood in nursery to take care of shrinkage of new soil. Make hole three feet wide and as deep as the height of tree above ground up to five feet. If necessary, use auger to obtain full depth. Set tree and pack soil firmly and give it all the water it will take, adding more soil as it settles.

Water twice to three times weekly depending on weather, using sufficient water to reach bottom of roots. If soil does not take water freely, bury a perforated gallon can near tree. fill with water which soil will slowly take up. In summer use mulch of straw, hay or Peat Moss at base of tree to help retain moisture. Also loosely wrap tree to first branch with paper to prevent sunburn.

Pecans usually grow in any soil, but the better the soil the better they grow and produce. Plant good pecans, give them proper care and sufficient water and you will be successful with them. You get out of them what you put into them.

DISTANCE FOR PLANTING PECANS

35 ft. by 35 ft. gives 35 trees per acre.
35 ft. by 70 ft. gives 17 trees per acre.
50 ft. by 50 ft. gives 16 trees per acre.
60 ft. by 60 ft. gives 12 trees per acre.
70 ft. by 70 ft. gives 9 trees per acre.

We desire to be as helpful as we can at all times. Write us for free, complete detailed information concerning the selection, planting and care of your nut trees, fruit trees, berry plants and grape vines.

Varieties as follows:

BURKETT—Round, thin-shelled, well filled nut, good flavor, good for West Texas.

Pecan trees growing in our field

DELMAS—Large, oblong, tapering nut, delicate flavor, medium shell, mature late, good for Central Texas.

MAHAN—Vigorous grower, early and prolific, giant size nuts, very thin shell, fine quality meat.

STUART—Good bearer. thick soft shell pecans, with sweet, brittle meat.

SUCCESS—Most popular Texas variety. Large oblong nut, plump smooth, kernels of good quality meat, prolific tree.

WESTERN SCHLEY—Regular bearing pecan. Soft shell, long white kernels, good in dry climates and high altitudes.

Write us if you desire other varieties not listed. We can supply others.

10 for \$30.00

YEW, PODOCARPUS: Recently introduced evergreen shrub. Slow, compact, growing upright shrub. Long, slender, dark green leaves.

\$2.00 per foot

EVERBLOOMING ROSES

Preparation of Rose Beds: 1. Remove grass, weeds or other plants for a width of 4 feet if a single row is to be planted; 6 feet wide if for 2 rows; 8 feet wide if for 3 rows. For convenience in tending and cutting of blossoms, it is best to have not more than 3 rows together. For further planting, allow a walkway of about 5 feet to the next row or series of rows.

2. Dig a trench 12 to 15 inches deep and 2 feet wide for each row.

3. Place 3 to 5 inches of rotten manure (cattle preferred) in the bottom of the trench.

4. Add 2 to 3 inches of soil on top of the manure or enough so the lowest branches and the union with the understock will be just above the soil level when the planting is completed.

Setting out the Bushes: 1. Soak the roots of the bushes in a tub of water for about an hour.

2. Trim the roots to not more than 12 inches long.

3. Prune the tops back to 6 or 8 inches from the union.

4. Place a mound of soil under the base of each bush so the roots slant downward into the trench. Cover the roots with soil and pack slightly by tamping or tramping. Water if the soil is dry.

Bushes may be spaced as close as 18 inches apart in a row.

All roses should be planted during dormant (winter) season. Always prune your rose bushes on arrival, and after first frost, also later in the winter just before they leaf out. Be sure not to leave any dead or dry limbs.

AMERICAN BEAUTY: Heavy, flower red.

AMI QUINARD: Blackish red.

MRS. CHAS. BELL: Shell radiance color.

BETTY UPRICHARD: Beautiful pink, two-tone flower with shades of copper. Hardy. Popular.

BRIARCLIFF: Pink, brilliant, perfect form. Sweet, cutting kind.

CALEDONIA—Large, white, very double; long-lasting, slightly fragrant. Long stems. Hardy.

COLUMBIA—Very double, well-formed, bright pink flowers which last a long time when cut. Delicious fragrance.

MRS. P. S. DuPONT: Fine yellow.

EDITOR McFARLAND: Choice dark pink, perfectly formed, deep rose-pink blooms, free bloomer.

F. J. GROOTENDORST: Small, fringed flowers of bright red, in large clusters throughout the season.

E. G. HILL: Beautiful dazzling scarlet blooms deepening to pure red, fragrant and lasting, abundant foliage, long stems, free bloomer.

CONDESA DE SASTAGO: Color, two-tone.

ETOILE de HOLLAND: Immense ovoid buds into very double cupped blooms of intense, velvety red; very fragrant. Moderate grower and bloomer.

FRANCIS SCOTT KEY: Large double, rich crimson blooms borne on long stems; long lasting. Vigorous and healthy bush.

KAISERIN AUGUSTE VIKTORIA: Beautifully shaped white rose, well formed, creamy buds with snowy-white petals. Magnolia like fragrance.

LADY HILLINGDON—An old favorite, but still good. Slender, pointed buds of deep saffron-yellow.

LUXEMBOURG: An unsurpassed yellow rose. Long pointed buds, open very full, deep bronze—yellow. Good and dependable.

GOLDEN OPHELIA: An excellent apricot-yellow rose. Hardy bush.

EDITH NELLIE PERKINS: Beautiful apricot-pink rose.

GRENOBLE: A vigorous grower producing plenty of beautiful scarlet-crimson flowers on long, strong stems. Fine for cutting.

POINSETTIA: Color, Christmas-red.

WRITE FOR TREES AND VARIETIES NOT LISTED

PRESIDENT HOOVER: Beautifully pointed buds, opening to large thick-petaled, broad blooms, multi-colored, varying from coppery-red to cerise-pink and orange-yellow.

RADIANCE, RED: Deep rosy-red with all fine qualities of Radiance. Hardy, strong, vigorous bush.

RADIANCE PINK: Universally favorite pink rose. Deep pink, blooms continuously.

ROUGE MALLERIN—Long pointed scarlet buds; red blooms, fragrant.

SENSATION—Crimson.

TALISMAN: Sensational multi-colored rose. Long, pointed buds, open into blooms of deep yellow with shadings of gold, scarlet, and rose.

RED TALISMAN: New, solid red.

YELLOW TALISMAN: New rich yellow.

F. K. DRUSCHKI: White.

POLYANTHA ROSES

The small growing, multi-flowered, bush roses that make beautiful specimens, rich colored hedges, borders and bright spots among shrub groups. They are long-blooming and cannot be excelled by any other flowering shrub for color and blooms.

CECILE BRUNNER: Sweetheart rose, clusters of small, perfectly shaped blooms of soft rose-pink tinged with salmon at base of petals. Very double flowers.

CHATILLON: Large clusters of medium, semi-double pink blooms. Good for hedges, borders, and color. Polyantha type, small growing.

EBLOUISSANT: Dainty, perfectly formed, miniature, double flowers like little rosettes, open to attractive cactus form. Growth, rarely over 10 inches high.

IDEAL: Rich, dark scarlet blooms, compact bushes, baby rose, polyantha type, excellent for mass plantings.

GOLDEN SALMON (Salmon): Distinct, bright, pleasing orange-salmon blooms in large clusters. Best polyantha.

CLIMBING ROSES

Climbing Roses are suitable for training on fence, trellis, pergola, or porch for hiding unsightly objects, and as they grow larger, for background planting with Hybrid Teas. They require little pruning.

COLUMBIA—Very double, well-formed, bright pink flowers which last a long time when cut. Delicious fragrance.

F. K. DRUSCHKI: Heavy bloomer, large white flowers; grows large.

ETOILE de HOLLAND: Red, hardy, vigorous blooming, climbing rose.

CLIMBING PRESIDENT HOOVER: The famous President Hoover, with its multi-colored pink, red, yellow and buff flowers, vigorous climber, producing beautiful flowers.

PAUL'S SCARLET: Most popular red climber. Brilliant, scarlet, medium size blooms in sprays of five and ten, very attractive.

BLAZE—Fine red.

RED RADIANCE: Beautiful rel, prolific bloomer.

RED TALISMAN: Color the same as the bush Talisman, except that flower develops larger and more perfect than on the bush. Beautiful on trellis.

K. A. VIKTORIA: Hardy, white, climbing rose.

PRICES ON ROSE BUSHES: Both bush roses and climbing roses sell at the same prices which are as follows:
2 year old—No. 1 Rose Bushes, each \$1.00
12 for \$11.50

PICK-UP PLANT FOOD

Pick-Up plant food is a scientifically prepared mixture of the major elements that are essential for vigorous plant growth. It contains 10% nitrogen, 52% phosphoric acid, and 17% potash. Not only is Pick-Up 79% pure plant food, but it has been given that extra refinement which is absolutely necessary to make the plant food ready for absorption by plant root systems. This additional processing of Pick-Up eliminates that indefinite period of useless waiting between the application of plant food and plant response.

Demonstrate the difference to yourself by leaving a few plants unfertilized. Seeing is believing.

COMPLETE DIRECTIONS FOR USE ARE ON ALL CONTAINERS

CAUTION: The extra refinement and concentration of Pick-Up plant food means that a small amount goes a long way. Therefore, use as directed.

FREE INFORMATION

At any time, we will be happy to furnish you with free information upon inquiry. Simply write us, and outline your problem and we will assist you. Our plants are grown at our Nursery in "magic"-like soil. Irrigated with water from four heavy producing water wells, 20 feet deep, furnishing un-ending supply of water—fresh, cool, crystal clear for better plant growth.

WRITE US FOR VARIETIES AND PRICES OF VEGETABLE AND GARDEN, AND FLOWER SEEDS. WE HAVE ALL KINDS OF SEEDS TO SELL.

PREMEER POWDER is highly effective against Caterpillars, Flea Beetles, Fuller's Rose Beetles, Harlequin Bugs and many other types of chewing insects.

3½ oz. Package—45c each, 1 lb. \$1.20
